ABOUT US

Elinar Oy Ltd is a Finnish privately owned ICT company. Elinar has delivered several case management and content management solutions based on IBM technology. In recent years, Elinar has developed artificial intelligence solutions especially for processing unstructured text data. The company has established branches in Sweden and Norway in 2010 and currently has a one-person office in Oslo.
**ORGANISATION**

**Services**
The team provides maintenance services to customers who have a separate maintenance agreement with Elinar.

**Systems**
The team installs and configures the software components required by the solutions into customers' and/or Elinar's service environment to work according to customers' agreed plans.

**Solutions**
The team designs and implements operational solutions to meet customer requirements.

**Operations**
The team has sales and marketing expertise and project management.

**MANAGEMENT**

Elinar's core team includes the CEO and Chief Technology Officer, Project Managers, Customer Service Manager, and Senior Architect and Consultant.
Over the past three years, Elinar has invested heavily in developing its own artificial intelligence solution. This work was boosted by the EU's new General Data Protection Regulation (GDPR), which came into effect in May 2018. Prior to that, Elinar, through its own innovation, participated in the IBM Watson Build Challenge international competition. It opened the way from 400 participated companies to the final round and, in the end, Elinar was ranked among the top four.

Elinar's Artificial Intelligence solution can leverage document and document management and/or the process of automation level significantly. Recognizable text or finding the actual content in the target material can achieve a 50-80% level by training artificial intelligence. There are recognized and practically tested solutions finding personal information, processing medical reports and automatic account of invoices.
VALUES

Confidential partnership
Our operations are based on the confidential partnerships we form with customers.

Profitable growth
The development of operations plays a key role in ensuring continued customer satisfaction and the well-being of our work community.

Commitment to quality thinking and corporate responsibility
Our operations are based on quality. Naturally, we are committed to maintaining the quality of our operations and continuously improving them.

Respect for people, individuals, and work communities
The respectful behavior implemented by the Elinar team applies to everyone, including colleagues, customers, and partners. The game rules created by the Elinar work community are one of the tools for a safe working environment where everyone has a good time.

Expertise inspires
Expertise is the continuous development of a person’s own knowledge. We encourage our staff to acquire new innovative skills but also appreciate the expertise that has accumulated over the years.
